

The 62nd Annual Wild Mushroom Show

Sponsored by the
Puget Sound Mycological Society

Saturday, October 25, 2025: 12 noon - 6 pm
Sunday, October 26, 2025: 10 am - 5 pm

Shoreline Community College
Student Union Building (Bldg. 9000)
16101 Greenwood Ave North
Shoreline, WA 98133
Adults \$10 / Students \$5.

Welcome to PSMS! We encourage research, education, cultivation, hunting, identification, and cooking of mushrooms. We're one of the largest mycological societies in North America. Learn more about mushrooms and fungi through monthly meetings, guest speakers, classes, workshops, identification clinics, field trips, our monthly newsletter *Spore Prints*, and our annual show.

Annual PSMS membership is \$30 for individuals or families, and \$20 for full-time students. Please come by the membership table or join online at www.PSMS.org

PSMS is a registered 501(c)(3) nonprofit organization. Your donations are tax-deductible. Contact us to identify your mushrooms and to learn about the wonderful world of fungi! Office voicemail: (206) 522-6031

Show Activities

ASK ME Program

Ask volunteers with "ASK ME" signs on their vests.

Mushroom Identification

Bring your mushrooms and learn what you found.

Cultivation

Make your own oyster mushroom kit. A limited supply of premade kits may also be available for purchase. Buy one and watch it grow.

Dyeing with Mushrooms

Learn about dyeing fabrics with mushrooms.

Tray Tours

Join an expert in touring the different mushroom displays.

Cooking and Tasting - Watch our talented members prepare and cook mushrooms for sampling and tasting.

Books and Vendors - purchase a reference book or field guide; explore the world of myco art, mushroom growing and mushroom products.

Lectures - Saturday October 25

1:00 - 2:00 - Noah Siegel - Cascadia: A Fungal Paradise

2:15 - 3:15 - Daniel Winkler - Fungal Fruits of the Forest: Choice Edible Mushrooms of the Pacific Northwest

3:30 - 4:30 - Dr. Katherine Glew - Lichens: Their Role in Pacific Northwest Environments

4:45 - 5:45 - Dr. Denis Benjamin - Medicinal Mushrooms: Hope or Hype?

Lectures - Sunday October 26

11:00 - 12:00 - Daniel Winkler - Great Edible Mushrooms Found Around the World

12:15 - 1:15 - Dr. Michael Beug - Should I have picked that mushroom either to eat or for art?

1:30 - 2:30 - Noah Siegel - Adventures of a Mycohobo

2:45 - 3:45 - Chad Hyatt - The Mushroom Hunter's Kitchen

About the Mushrooms...

The fungi on display are grouped according to the way they bear their reproductive spores.

AGARICS are the most recognizable group:

Gilled mushrooms that bear their spores on gills

NON-AGARICS bear their spores elsewhere:

Boletes have compact tubes under the cap

Veined mushrooms have folds or "veins"

Puffballs & Earthstars bear spores inside and expel them through a central opening

Cups bear spores on round cup-shaped fruit bodies

Polypores have small pores and may be irregularly shaped

Toothed mushrooms bear spores on hanging "teeth"

Clubs & Corals bear spores on upright branches

Jellies have soft, gelatinous fruiting bodies

and many more: **Bird's Nests, Truffles, Crusts** and **Morels** their relatives!
